SPONSORS & EXHIBITORS

NASEO and its members wish to extend special thanks to the sponsors and exhibitors of our 2006 Energy Outlook Conference. Please meet our sponsors and exhibitors to learn more about their organizations. The following is a list of the NASEO 2006 Energy Outlook Conference partners:

EDISON ELECTRIC INSTITUTE (EEI) is the association of United States shareholder-owned electric companies, international affiliates, and industry associates worldwide. Our U.S. members serve 97 percent of the ultimate customers in the shareholder owned segment of the industry, and 71 percent of all electric utility ultimate customers in the nation. They generate almost 60 percent of the electricity produced by U.S. electric generators.

Organized in 1933, EEI works closely with all of its members, representing their interests and advocating equitable policies in legislative and regulatory arenas. In its leadership role, EEI provides advocacy, authoritative analysis, and critical industry data to its members, Congress, government agencies, the financial community and other opinion-leader audiences. EEI provides forums for member company representatives to discuss issues and strategies to advance the industry and to ensure a competitive position in a changing marketplace.

THE DIESEL TECHNOLOGY FORUM represents manufacturers of engines, fuel and emissions control systems. It brings together the diesel industry, the broad diesel user community, civic and public interest leaders, government regulators, academics, scientists, the petroleum industry and public health researchers to encourage the exchange of information, ideas, scientific findings and points-of-view to current and future uses of diesel power technology. For more information about the Forum, visit our web site at www.dieselforum.org.

THE NATIONAL BIODIESEL BOARD (NBB) is the national trade association representing the biodiesel industry as the coordinating body for research and development in the United States. **THE UNITED SOYBEAN BOARD** and state soybean board checkoff programs provide support to NBB. Go to <http://www.biodiesel.org/aboutnbb/alliance/> to join the Biodiesel and Alliance and receive timely updates on the biodiesel industry

EYP/

Einhorn Yaffee Prescott
Architecture & Engineering P.C.

EINHORN YAFFEE PRESCOTT, ARCHITECTURE & ENGINEERING (EYP) is a 250 person multi-disciplinary architecture and engineering firm with offices in Albany and New York, NY; Boston, MA; and Washington, DC. EYP has an in-house engineering staff of over 100 mechanical, electrical, structural, and plumbing engineers with experience in both renovation and new construction, for one building or an entire complex. In addition, energy-conscious designs are an integral part of all of EYP's projects. The firm has completed energy studies for more than 4,000 facilities throughout the world. EYP has also completed several LEED certified projects, and is currently working toward the certification of many others including a structure with the largest green roof east of the Mississippi River. EYP is committed to design excellence, to fulfilling the needs of our clients, and to the careful management of time and money. www.eypae.com

SPONSORS & EXHIBITORS

THE DEPARTMENT OF ENERGY'S overarching mission is to advance the national, economic, and energy security of the United States; to promote scientific and technological innovation in support of that mission; and to ensure the environmental cleanup of the national nuclear weapons complex. The U.S. Department of Energy launched the **Save Energy Now Initiative** to help American businesses, factories, and manufacturing facilities save energy and continue to thrive during this time of diminished supplies and rising energy costs. Energy supply disruptions caused by hurricanes Katrina and Rita, and recent hikes in energy prices, are impacting everyone in the United States, including the nation's industrial sector. The **Industrial Assessment Centers (IACs)**, sponsored by the DOE Energy Efficiency and Renewable Energy's Industrial Technologies Program, provide eligible small- and medium-sized manufacturers with no-cost energy assessments. Additionally, the IACs serve as a training ground for the next-generation of energy savvy engineers. Teams composed mainly of engineering faculty and students from the centers, located at 26 universities around the country, conduct energy audits or industrial assessments and provide recommendations to manufacturers to help them identify opportunities to improve productivity, reduce waste, and save energy. Rutgers University, through its Center for Advanced Energy Systems serves as the Field Manager for the IAC Program and serves as an active partner in the Save Energy Now Initiative.

NAIMA is the association for North American manufacturers of fiber glass, rock wool, and slag wool insulation products. Its role is to promote energy efficiency and environmental preservation through the use of fiber glass, rock wool, and slag wool insulation, and to encourage the safe production and use of these materials.
