

## GRID MODERNIZATION INCLUDES INCREASING ELECTRIC GRID EFFICIENCY

[Learn how](#) High-Performance Conductors are improving the Efficiency, Capacity, Reliability, & Resilience of the Electric Grid  
*--- and why it matters!*

### CTC Global Company Description

CTC Global, based in Irvine, California, developed, tested and patented the high-performance, energy-efficient ACCC® Conductor that is manufactured in association with 34 conductor manufacturers, worldwide. To date, over 800 ACCC Projects have been completed in 52 countries representing over 100,000 km of ACCC Conductor currently being used to improve the efficiency, capacity, reliability and resilience of the world's electric power grid. For more information please visit [www.ctcglobal.com](http://www.ctcglobal.com).
