
Offshore Wind Virtual Tour

Ports + Operations & Maintenance

Wednesday 9 December 2020. 11:00 AM to 1:00 PM (Eastern)

This event is divided into two sessions and is structured to give attendees a good overview of the different types of ports associated with offshore wind. It then examines offshore wind Operations & Maintenance (O&M): the types of jobs required, and the ports needed to support them.

As with previous and future events: Our aim is to be brief, light on data and heavy on graphics and videos – thereby providing attendees with a comprehensive visual overview: hence Virtual Tour!

Ports

11:00 EDT / 17:00 CET	Welcome and introduction. David Terry , Executive Director, <u>National Association of State Energy Officials</u>
	Introduction to day. James Glennie , Senior Commercial Advisor – Offshore Wind, <u>Embassy of Denmark</u>
