

Valero is the largest global independent refiner and one of the world's largest producers of renewable fuels. Valero operates 15 petroleum refineries with a combined throughput capacity of approximately 3.2 million barrels per day and 14 ethanol plants with a combined production capacity of 1.73 billion gallons per year. Valero is a joint venture partner in Diamond Green Diesel, which operates the largest biomass-based diesel plant in North America, producing 275 million gallons per year. An expansion is currently under construction, which will more than double the current capacity to 675 million gallons per year by late 2021. Diamond Green Diesel produces low-carbon intensity renewable diesel, a drop-in fuel fully compatible with today's diesel infrastructure and engines that can reduce lifecycle emissions by up to 80%.
