

VEIC is a sustainable energy company on a mission to generate the energy solutions the world needs. For over 30 years we have been working with governments, utilities, foundations and businesses across North America to develop and deploy clean energy services that provide immediate and lasting change. VEIC is headquartered in Vermont, with additional offices in Columbus Ohio and Washington D.C. With expertise in energy efficiency, building and transportation electrification, and new approaches for a clean and flexible grid, we bring solutions to the market that meet goals and move our clients forward. Our full service consulting and program implementation team is nationally recognized for developing innovative pilots and programs that optimize energy use, reduce energy burdens for low-income customers, and advance new technologies. In addition to our consulting work, we administer three large-scale sustainable energy programs: [Efficiency Vermont](#), [Efficiency Smart](#), and the [DC Sustainable Energy Utility \(DCSEU\)](#).

### Results that make a difference

Our work since 2000 will reduce greenhouse gas emissions by

107,201,574

metric tons over the lifetime of efficiency and renewable energy investments

\$4b

Participants across our programs will save more than \$4b over the lifetime of efficiency measures

23

In 2019 we worked in 23 states/provinces across North America

\$62m

We've paid incentives totaling over \$62m to program participants and partners for low-income programs
