• Provide complete range of CNG Fueling Services
  – Design / Build / Operate / Maintain / Finance

• Build public and private access stations
  – Transit, trucking, refuse markets are key

• Owned by Integrys Energy Group (NYSE: TEG)
  – Trillium CNG formed in 2011 with acquisition of Trillium USA and Pinnacle CNG
TRILLIUM CNG – STATION NETWORK

Over 80 CNG Stations Built, Upgraded, or Operated
CNG Stations are a “System”

System means a machine, product, or device, or a combination of such equipment, consisting of individual components, whether separate or interconnected by piping, transmission devices, electrical cables or circuitry, or by other devices, which are intended to contribute together to a clearly defined function.

Factors to consider in determining whether a system constitutes an end product include:

– Whether performance warranties apply to an integrated system (regardless of whether components are separately warranted);

– whether products perform on an integrated basis with other products in a system, or are operated independently of associated products in the system;

– or whether transit agencies routinely procure a product separately (other than as replacement or spare parts).

49 CFR Part 661.3
Typical Transit CNG Station

1. Gas Dryer
2. Compressors
3. Storage Vessels
4. Dispensers

Trends

• US compressors are used in majority of CNG stations built for government funded projects
  – Several compressor companies trying to enter US market, from Canada, Europe and S. America
  – DOE has denied previous waiver requests

• New CMAQ rules allow funding for CNG stations that support trucking fleets, major growth area for CNG
